6.00

**UCEAP Semester Units**

4.00

## Course Description

This course offers an interdisciplinary approach to understanding the importance of our oceans as the driver of our climate, source of sustenance, and focus of domestic and international political, economic and legal negotiations. Students explore topics including but not limited to oceanic processes such as global and local currents and oceanic weather, marine life and marine biology, resources within our oceans, and the future and potential futures of the world's oceans as affected by humans and global warming.

## Language(s) of Instruction

English

## Host Institution Course Number

MARINE 100G

## Host Institution Course Title

THE OCEAN AROUND US
