Course Description

This is an advanced course in macroeconomic theory. It examines macroeconomic and monetary issues, studies various models, and focuses on the role of policymakers in shaping macroeconomic outcomes. The final part of the course takes a close look at the recent financial crisis and the Great Recession. Topics include: reasons for economic growth and the policies for economic growth; the large differences in economic performance across different countries at different times; reasons for booms and recessions; government stabilization of the economy against business-cycle fluctuations; unemployment and policies to reduce unemployment; how central banks affect interest rates, and how interest rates affect the economy; role of central banks during a recession; financial crises; and how central banks should react to financial crises.
