16

**UCEAP Course Suffix****UCEAP Official Title**

FORENSIC SCIENCE

**UCEAP Transcript Title**

FORENSIC SCIENCE

**UCEAP Quarter Units**

6.00

**UCEAP Semester Units**

4.00

## **Course Description**

This course introduces the multi-disciplinary subject of forensic science and forensic medicine. Forensic science involves the utilization of a broad spectrum of scientific principles and analysis to provide answers to issues of law and in evidence. Forensic medicine involves the medico-legal investigation of death. This course pulls in experts from the different fields to expound on the intricacies of forensic science on a multi-disciplinary level. These experts share the recent developments in crime scene investigation using the latest scientific technology, and in areas where forensic science techniques are rapidly gaining prominence in our local courts. Other topics include various aspects of the law such as criminal law, procedure and evidence. Past court cases of crime are discussed for their scientific value, and not for voyeuristic purposes. Students have to treat cases discussed with respect. Photography and any form of recording are not allowed.

## **Language(s) of Instruction**

English
