UCEAP Semester Units

4.00

Course Description

Artificial intelligence (AI) is now widely used, usually in the form of machine learning, in a broad range of applications including finance, healthcare, law, and social care, as well as playing a role in the arts and humanities as a tool to explore culture. This course introduces students to the issues raised by the development and deployment of AI. The content focuses on providing information and raising debate about the known and predicted effects of artificial intelligence on culture and society.

Language(s) of Instruction

English
