Course Description
Under the supervision of a faculty member, students conduct an independent research project in the field of biological sciences. Based on initial observations, students write a proposal in which they pose the question they wish to address. Students then collect and analyze data, and write a research paper. Their first submission is reviewed by two instructors and a peer reviewer. Students revise and improve their first submission and submit the final paper. Students present their findings orally in a symposium that is open to the public. * Contracted independent study is for 20 hours per week.
