6.00

**UCEAP Semester Units**

4.00

## Course Description

This course examines how textual evidence may be used by students of different disciplines to study past societies, with a particular focus on archaeological research. It draws on written sources from the Near East and Eastern Mediterranean to explore issues such as the materiality of texts, literacy and orality, the relationship between texts, physical space and visual media, and the social and cultural contexts in which writing was used.

## Language(s) of Instruction

English
