UCEAP Transcript Title

DEVELOPMENT BIOLOGY

UCEAP Quarter Units

6.00

UCEAP Semester Units

4.00

Course Description

This course examines embryogenesis, starting from fertilization to birth in the case of animal development; and to germination, growth and differentiation in plants. It covers concepts, principles and mechanisms that underlie development in plants and animals. Different organism models are studied to demonstrate the rapid advances in this field of life sciences

Language(s) of Instruction

English
