Course Description
The course enriches students' reading experience of texts in English by helping them to identify biblical themes in literary texts. In order to achieve this, the course offers an introduction to significant biblical themes and stories. The complexity and richness of the Bible, including the history of its composition and its own intertextual patterns, are explored. Biblical themes in poetry, drama, and novels from a wide time perspective are considered, and their significance discussed. Theories about intertextuality are considered in relation to the Bible, and the history and influence of the King James Version of the biblical text is highlighted.
