### **Course Description**

Operations and Production are the resources and the processes, respectively, by which an organization transforms inputs (e.g., labor, material, and knowledge) into outputs (products and/or services). Operations/production managers are responsible for designing, running, and improving the related systems to efficiently deliver on the production/service goals. This course focuses on the basic concepts and tools employed by operations/production managers to provide their organizations with competitive advantages in terms of operations strategy, process design, quality, supply chain management, and resource planning and utilization.
