Course Description

How are gender and politics related? Issues of gender have always been issues of inequality, power, and recognition struggles, as well as conquests of social, political, and civil rights. The influence that feminist theory has had on international relations and political science is often ignored. This course explores a history of gendered thinking, social movements, feminist theories, and social struggles. Students learn why linking gender and political thought is key to the achievement of equality and justice for all genders. The course covers intersectionality, hegemonic masculinities, and sexuality to challenge traditional notions of gender.
