3.00

Course Description

In recent decades, a growing interest in material cultures and the sociology of space has elevated the status of architecture in sociological discussions. This seminar examines how different architectural forms take part in a range of different social practices. To what extent are they part of social practices, support or suppress them? The course adopts a simple scheme of spatial directions to discuss forms of enclosure (prisons), verticality (skyscrapers), liminality (borders), flows (logistics), etc.
