6.00

**UCEAP Semester Units**

4.00

## Course Description

This course examines the discipline of international relations. Students first study the discipline's main theories, concepts, and debates, and then focus on current issues in international relations. Students examine a range of theories including realism, liberalism, constructivism, critical theory, and post-structuralism. They evaluate the utility and power of these theories vis-à-vis key issues in international politics, such as security, the environment, humanitarian intervention and global governance.
