Course Description
This course surveys basic phonological data and analyzes such phonological data as a linguist. Course topics include: distribution and alternation. feature theory and rule formation, rule ordering, syllable and stress, non-linear representation, prosodic morphology and current issues in English phonology. Upon successful completion of this course, students should be able to find phonological patterns from language data and formulate rules and identify/discover constraints that explain observed data. Textbook: Odden, D., INTRODUCING PHONOLOGY. Prerequisite: Intro-level linguistics class (e.g., ELL2101: Introduction to English linguistics)
