**UCEAP Quarter Units**
8.00

**UCEAP Semester Units**
5.30

**Course Description**

This course introduces social and developmental psychology. It considers behavior in the context of social interaction, and on key stages of perceptual, cognitive, and social development. The course takes a biological perspective where appropriate and placing an emphasis on experimental findings. This course covers the ways in which social and developmental psychologists think, the major theoretical perspectives they might take, how they carry out research, and what the results of this research mean.
