Course Description

This course is intended for students in computing disciplines whose work focuses on human-computer interaction issues in the design of software systems. The course stresses the importance of user-centered design and usability in the development of software applications and systems. Students are taken through the analysis, design, development, and evaluation of human-computer interaction methods for software systems. They acquire hands-on design skills through laboratory exercises and assignments. The course also covers HCI design principles and emphasizes the importance of contextual, organizational, and social factors in system design.
