UCEAP Transcript Title NATURE OF LANGUAGE
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description

This introductory overview of linguistics provides a solid foundation in the object, methods, and goals of the science of spoken language -- the prime tool of human communication. Through a principled analysis of patterns of sound, form, and meaning at the levels of word, sentence, and text, the course provides insight into what it means to say that language is a rule-governed system and an organic whole. The course examines and explores the relationship between language and mind, society and culture.
