**UCEAP Semester Units**

2.70

## Course Description

This course focuses on how policy is developed and implemented at the interface between the behavioral and brain sciences (BBS) and policy development and implementation in the public and private spheres. The course explores how the BBS inform and shape policy formation and policy execution, as well as the place of the BBS as they interact with organizations and society. Topics include the origins of policy; recent advances in theory and practice; findings from behavioral economics and nudge theory; and large-scale applications of behavioral insights teams within governments, non-governmental organizations, and the private sector.
