EMOTION

**UCEAP Quarter Units**

6.00

**UCEAP Semester Units**

4.00

## Course Description

This course allows students to learn about the different conceptualizations of emotion both in terms of historical developments as well as contemporary theoretical models of emotion. The course considers the biological basis of emotions in the brain and the body, and how emotions are expressed and perceived in faces, bodies, voice, and music. The relationship between emotion and cognition is considered, including emotional regulation and individual differences in emotions. Cultural differences and emotional disorders are discussed.

## Language(s) of Instruction

English

## Host Institution Course Number

PSY127
