4.00

Course Description

Large organizations have specialized departments with annual budgets to analyze how industry-wide innovations can be adapted to gain competitive advantage. There is a gap in the industry for all-rounded professionals who understand how to quantify, apply AI-driven solutions and scrutinize these innovations and manage resulting business risks strategically. This course addresses this skill gap in the market, improves prospects for jobs that require such cross-disciplinary awareness and provides the basic knowledge for students to gain further professional qualifications.
