GAME THRY& DECISION

**UCEAP Quarter Units**

6.00

**UCEAP Semester Units**

4.00

**Course Description**

This course focuses on a theoretical approach that has fundamentally changed economics and political science over the past 20 years, namely game theory. Game theory studies strategic interaction between economic agents. Students develop an understanding of how game theory can be used to analyze theoretical, applied, and policy problems in political economy. It enables students to make well-informed judgments about the strengths and weaknesses of game-theoretical models.
