Course Description

In this course, students analyze the interplay between migration and health, i.e. the physical, mental, and social wellbeing of migrants. The ability of a migrant to integrate into a host society is based upon combined mental, physical, cultural, and social well-being. Absence of physical ill-health is not by itself sufficient for successful integration in a host society. However, the structural inequalities experienced by migrants have a significant impact on overall health and well-being.
