## Course Description

This introductory course in social psychology presents the methodological and theoretical issues of the discipline through the acquisition of historical, empirical, and analytical reference points. It explores major issues specific to contemporary societies, such as the formation of norms, social identity, and submission to authority. In particular, the course focuses on the phenomena known as "crowd psychology," at the crossroads of individual and collective psychology. It explores the specific issues and reasoning in "crowd psychology" through authors, trends, and concrete experiences.
