4.50

UCEAP Semester Units

3.00

Course Description

This course is to learn Korean language through various projects and games. Data compiled from the weekly quests will be analyzed to create algorithms using generative AI to train our NPCs for our Survival Korean MMORPG game. This is also part of the "Generative AI in Education APRU Project" supported by Microsoft. It focuses on "real life challenges" and acculturation while empowering language learners at the most elementary level using gaming and digital technologies/platforms like CHATGPT and COPILOT to generate interest.
