4.00

## Course Description

This course examines the mechanics of conversation from a scientific viewpoint. Students learn to analyze the verbal and non-verbal aspects of everyday conversation using the method and findings of Conversation Analysis (CA). CA is not a method for understanding why people speak they way they do but rather how people speak in their everyday lives: how they take turns in a conversation, how they fix problems of speaking and understanding, in sum how they interact with each other to achieve mutual understanding.

## Language(s) of Instruction
