UCEAP Subject Area(s) Biological Sciences
UCEAP Course Number 115
UCEAP Course Suffix
UCEAP Official Title BASIS OF HUMAN DISEASE
UCEAP Transcript Title BASIS HUMAN DISEASE
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description
This course offers an overview of the immune system and characteristics of selected diseases/syndromes. It offers a study of the following: endocrine organs and systems relevant to the selected disease states; mechanisms of hormones and receptors relevant to the selected disease states; modulation of hormone levels in healthy and disease states; regulators and errors contributing to the disease state; clinical presentation and progression of the selected diseases/symptoms; linkage of the symptoms with system errors. This course also discusses diagnostic tools, drugs, and therapies, disease management, and applications of biochemical techniques used in biomedical research and forensic sciences.
