4.00

**Course Description**

This course focuses on the linguistic and psycholinguistic underpinnings of the bilingual mind/brain as a means of understanding the unique human capacity for language. The course begins with discussions on language acquisition before moving on to explore bilingual acquisition and what it means to "acquire" a new language. Investigation encompasses several different models of bilingualism. The course also covers code-switching, the cognitive effects of bilingualism, and multilingual education and language policy.
