CONSTRUCTIONARIUM

**UCEAP Quarter Units**

4.00

**UCEAP Semester Units**

2.70

## **Course Description**

This course examines the role of the engineer as contractor and constructor, and fosters an appreciation of the relationship between hands-on engineering and theoretical teaching. Students learn to take responsibility for construction planning, processing, and production by practicing to work as an engineering firm. Through on-site experiences, they learn about construction projects from start-to-finish. The project involves forming construction firms of approximately 20 students to build a structure of significant scale in five days at the National Construction College.

## **Language(s) of Instruction**

English

## **Host Institution Course Number**

CI2-212

## **Host Institution Course Title**
