PRESSURE GAIN COMBUSTION

UCEAP Transcript Title

PRESS GAIN COMBUSTN

UCEAP Quarter Units

5.50

UCEAP Semester Units

3.70

Course Description

This class examines a major part of fluid mechanics: gas dynamics. It covers concepts such as combustion, compressible flows, normal and oblique shocks, and detonation. In addition, the course also focuses on applying the concepts of thermodynamics and fluid mechanics to propulsion systems such as a pulsejet and a rotating detonation combustor.

Language(s) of Instruction

English
