UCEAP Course Suffix
UCEAP Official Title QUANTITATIVE ANALYSIS IN MANAGEMENT
UCEAP Transcript Title QUANT ANALYSIS/MGMT
UCEAP Quarter Units 8.00
UCEAP Semester Units 5.30

Course Description

The course covers the use of data analysis tools and techniques and data sources used to solve problems in a business and management environment. It focuses on how to use Excel to perform data analysis and how to interpret the resulting analyses involving uncertainty and variability; how to model and analyze the relationships within business data; and how to make correct inferences from the data (and recognize incorrect inferences). The course utilizes advanced computer modelling tools available in Microsoft Excel to analyze and present quantitative data. It therefore develops practical skills in statistical and mathematical techniques commonly used in business and management decision-making.
