POPULATION STUDIES

**UCEAP Quarter Units**

4.00

**UCEAP Semester Units**

2.70

## **Course Description**

The course introduces the spatial patterns and dynamics in the distribution, composition, and change of population, and its relationship with variations in the nature of places. It explores demographic patterns, regularities, and order in space, and seeks to explain these patterns. The course covers basic concepts, measures, theories, and demographic perspectives of population change. It also examines global trends in population growth and the factors explaining the timing and pace of these trends, as well as major theories explaining population change.

## **Language(s) of Instruction**

English
