Course Description

This course provides practical experience in early stages of starting a technology-based start-up. The course is based on principles from lean-startup and business model canvas. Through practical experience, student-driven seminars, inspirational lectures and literature studies, understanding of business model components in the start-up process, as well as ability to analyze and validate an idea or invention is mainly achieved through customer-based development and experimentation with minimum viable products. This understanding is used to develop an efficient and scalable business model and review the business model from sustainable and ethical perspectives.
