**UCEAP Semester Units**

3.00

## Course Description

This course studies industrial policy and management through case studies. Topics include the significance and issues of industrial policy, the global value chain that affects industrial policy, the digital economy following the 4th industrial revolution, the low-carbon economy due to climate change, and the circular economy perspective in consideration of the earth's limitations in natural raw material mining. The present status and future implications of Korea's industrial policy through comparative review with domestic and foreign industrial policies are checked through case studies of major industrial policies.
