**UCEAP Transcript Title**

MONETARY ECONOMICS

**UCEAP Quarter Units**

4.50

**UCEAP Semester Units**

3.00

## **Course Description**

This course is an introduction to monetary policy. It provides theoretical frameworks, facts, figures, and historical case studies to understand modern monetary policies. The course begins by asking what money is and what purposes it serves. It then discusses what central banks do and how and why their mandates evolved over time. Policy issues that are relevant to the conduct of modern monetary policy are reviewed, such as the credibility of central banks, how monetary policy affects the economy, and the welfare costs of inflation/deflation.
