## Course Description

This course focuses on environmental issues and sustainable development. The course covers three themes: the historical roots of and current discourses on sustainable development; the theories of managing common pool resources and their implications for sustainable development; and connections to specific environmental challenges. The course introduces students to the multidimensional aspects of sustainable development and their link to environmental challenges on global, national, and local levels. A special focus is put on the sustainable management of common pool resources. In addition, specific environmental challenges are used to illustrate the complexity of the issues and their implications for sustainability.

## Language(s) of Instruction

English

## Host Institution Course Number

2SK152

## Host Institution Course Title

GLOBAL SUSTAINABLE DEVELOPMENT
