

# COURSE DETAIL

## ECONOMICS 2

**Country**

United Kingdom - Scotland

**Host Institution**

University of Edinburgh

**Program(s)**

University of Edinburgh

**UCEAP Course Level**

Upper Division

**UCEAP Subject Area(s)**

Economics

**UCEAP Course Number**

113

**UCEAP Course Suffix**

Y

**UCEAP Official Title**

ECONOMICS 2

**UCEAP Transcript Title**

ECONOMICS 2

**UCEAP Quarter Units**

16.00

**UCEAP Semester Units**

10.70

### **Course Description**

This course develops a rigorous understanding of core economic models and analysis, together with an ability to apply the analysis in a variety of contexts. In the first semester, students consider macroeconomic (aggregate, economy-wide) phenomena. They look in greater depth at national income accounting, economic growth, money and inflation; labor markets and unemployment, and consider relevant mathematical techniques. The second semester looks at macroeconomics and includes topics such as monetary and fiscal policy, the open economy, exchange rate systems and monetary union, business cycles, economic policy and financial markets. The course is taught through a program of lectures and tutorials. Learning-by-doing, through problem solving and tutorial work, is an important ingredient of the course, with regular practice tests to reinforce an active approach to learning. Students with a weak math background will need to be prepared to work at developing their math skills.

### **Language(s) of Instruction**

English

### **Host Institution Course Number**

ECNM08006

### **Host Institution Course Title**

ECONOMICS 2

### **Host Institution Campus**

University of Edinburgh

### **Host Institution Faculty**

school of Economics

### **Host Institution Degree**

### **Host Institution Department**
