6.00

UCEAP Semester Units

4.00

Course Description

This course teaches students to analyze trends in science, engineering, and technology research and development, and how to communicate these trends persuasively to a particular audience. Students receive tuition, practice, and feedback on their writing and research, as well as the opportunity to do interviews, attend conferences, and go on laboratory visits. In addition, students learn to constructively criticize, analyze, and edit the work of others.
