## Course Description

The course focuses on international and global environmental issues related to sustainable development. Lectures and seminars present the issues through selected literature. The course covers the concept of sustainable development, environmental history, climate change, environmental impacts in connection with the use of natural resources, and energy issues. The course also discusses consumption patterns and the environment, environmental economics, the role of international institutions, policy making, and cultural and ethical aspects on environment.

## Language(s) of Instruction

English

## Host Institution Course Number

FMIF20
