Course Description

The course provides a study on environmental economics in order to evaluate environmental consequences of economic activity, as well as interpret market-based instruments of environmental regulation. It examines the economics of renewable and non-renewable natural resources; concepts for the valuation of non-market amenities; environmental cost- benefit analysis; techniques of valuation of environmental impacts; and theory of optimal management of renewable and non-renewable resources. NOTE: This course is the same as ECON 117, but taught in English.
