Course Description
This course is a topic of science and technology innovation policy. The course provides understanding of the frontiers, cutting-edge methods, and issues related to science and technology innovation policy, the development and latest developments of this research field, and technological innovation for public management. The new challenges brought about by the policy strengthen the grasp of the future direction of public governance and public policy, and can put forward research issues in combination with China's scientific and technological innovation and public policy practices. This course requires students to have a basic knowledge of public policy theory and a strong interest in science, technology, innovation activities and governance issues.
