UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description
Medical anthropology is the study of how health and illness are shaped, experienced, and understood in light of global, historical, and political forces. This course introduces foundational concepts, theories, and methods in medical anthropology and the anthropology of health and illness. The course illuminates how anthropological approaches and methods are applied to understanding and improving contemporary health challenges. It reflects on health inequalities and identifies key debates among anthropologists about various ways to approach and address illness.
