Course Description

The Veterinary Medicine Experience runs every Wednesday afternoon for ten weeks throughout semester one and is aimed at students currently undertaking a science major undergraduate degree. It enables students to experience first-hand all of the School of Veterinary Studies' research, teaching, clinical, and farm facilities. This pathway is designed for students who wish to study veterinary medicine after graduating. Students gain intensive veterinary work experience at the world renowned Easter Bush Campus, located in the area with the largest concentration of animal science expertise in Europe and incorporating the Roslin Institute, equine, farm, small and exotic animal practices, School of Veterinary Medicine teaching facilities, the University farms, and the Global Academy of Agriculture and Food Security. The Veterinary Medicine Experience offers practical classes in the following areas: small animal practice, internal medicine, and diagnostic imaging; veterinary clinical skills; exotic animal practice; farm animal hospital and a visit to Langhill Dairy Farm; equine hospital, equine first aid, and large animal clinical skills; introduction to pathology; veterinary public health; and sustainability and food production.
