UCEAP Course Suffix
UCEAP Official Title EUROPE IN THE GLOBAL ECONOMY
UCEAP Transcript Title EUR IN GLOBAL ECON
UCEAP Quarter Units 4.50
UCEAP Semester Units 3.00

Course Description
Through this course, students are introduced to the enlargement process that made the EU and consider whether that process is paying off. The changing global economy is covered along with the comparative advantage that Europe might have in that economy. Other topics covered include: the design of the Euro; Russia as a major energy partner; Europe's energy independence; energy hunger in China and Brazil and the possible threat it poses to the EU; the cost of global warming and climate change; what is the future of the EU 30 years from now. Lastly, a look at Europe's social model shows how free markets and social responsibility are combined for more inclusion and less income disparities within member states.
