COURSE DETAIL

SOCIAL COGNITION
Country Korea, South
Host Institution Yonsei University
Program(s) Yonsei University
UCEAP Course Level Lower Division
UCEAP Subject Area(s) Sociology Psychology
UCEAP Course Number 66
UCEAP Course Suffix
UCEAP Official Title SOCIAL COGNITION
UCEAP Transcript Title SOCIAL COGNITION
UCEAP Quarter Units 4.50
UCEAP Semester Units 3.00

Course Description
The social sciences are at the cusp of a revolution with recent advances in neuroimaging and data science. Hyperscanning techniques simultaneously recording neural activity from multiple people are revealing patterns of brain-to-brain synchrony during social interaction. Analysis of Big Data can now provide an empirical foundation for predictive models of behavior. Together, the emerging field of social neuroscience is able to address questions long speculated over in the humanities. This course explores the foundations of this coming revolution in the field of social cognition from multidisciplinary perspectives combining the sciences, humanities, and engineering. Special attention is given to the neurological basis of group behavior such as collective emotion, attention, and action. This also involves studying theories of social interaction such as love and attachment, mass religious and political rituals, and the historical evolution of social cognition.

Language(s) of Instruction
