Course Description

This course is a study on the main variables that influence the behavior of economic agents. It covers the basic concepts of consumer theory, uncertainty and risk, the theory of the firm, and partial equilibrium analysis. Additional topics include: utility functions, budget sets, demand functions, labor supply, taxes, subsidies, price indices, risk aversion, attraction to risk, technology and production, demand factors, cost functions, supply functions, and the regulatory policies in competitive and monopolistic markets: price controls, quotas, taxes, subsidies, and tariffs. NOTE: This course is the same as ECON 105, but taught in English.

Language(s) of Instruction

Spanish
