6.00

UCEAP Semester Units

4.00

Course Description
The course explores how different ways of conceptualizing environmental issues influence the ways in which people frame discussions and debates on the relationships between environment and society. Topics include natural resources management such as fisheries, water, forests, agriculture, climate change, species conservation, transport, pollution, wilderness/rewilding, and urban nature/gardening/agriculture.

Language(s) of Instruction
English
