Course Description

The course reviews the shaping of Swedish industrial culture and society from 1800 to 2000. The topics addressed include the transformation of the agricultural production system and the development of an infrastructure for transport, communications, and power transmission. The significance of technical change for the transformation of Sweden from a poor country to an industrialized and democratic society with a well-developed welfare state, Sweden's military-industrial complex, and the concept of the Swedish model are analyzed in the course.
