Course Description

This course focuses on understanding and communicating visual information. Students are trained using clear and concise methods to become visually literate using creative information skills and techniques. Students learn how to create and read flow charts, landscape diagrams, schematics, and technical illustration to make information easier to understand. The course demonstrates functions and depicts sequences of hierarchies, associations, relationships, interconnections, and links with many diverse approaches suitable for application in diverse disciplines. Students develop graphic skills through lectures and practice during tutorials to encourage personal expression, visual interpretation of materials, and understanding of the world.
