Course Description

This course is part of the LM degree program and is intended for advanced level students. Enrollment is by consent of the instructor. The course provides students with an understanding of how a food supply chain is structured, operates, performs, and is managed to increase its competitiveness and sustainability. The course discusses topics including the relevance of food supply chain management; the factors influencing companies' strategic adjustment to markets globalization and other drivers of change; tools to manage a supply chain; developing critical thinking: discussing supply chain real world experiences; and experiencing the uncertainty in supply chain management.
