DRUGS AND DISEASE A
Country United Kingdom - England
Host Institution King's College London
Program(s) King's College London
UCEAP Course Level Upper Division
UCEAP Subject Area(s) Biological Sciences
UCEAP Course Number 157
UCEAP Course Suffix
UCEAP Official Title DRUGS AND DISEASE A
UCEAP Transcript Title DRUGS & DISEASE A
UCEAP Quarter Units 6.00
UCEAP Semester Units 4.00

Course Description
This course teaches the pharmacological actions of a selection of the main classes of drugs in current therapeutic use. Lectures provide insight into the use of drugs in the treatment of a variety of human diseases ranging from cardiovascular and respiratory disease, inflammation, allergy, and pain. The drug treatment of these diseases is considered against the backdrop of the underlying disease processes, focusing on the mechanisms by which the drugs bring about therapeutic relief. Through self-directed learning and the production of coursework, opportunity is given to learn more about the use of "off-the-shelf" herbal remedies.

Language(s) of Instruction
English
