FIN MRKTS&GLBL ECON

UCEAP Quarter Units
5.50

UCEAP Semester Units
3.70

Course Description

Have financial crises become more frequent and more severe over time? What can early bubbles tell us about the state of different stock markets? Was fiscal policy as important as monetary policy in helping recovery in Britain and the US after the Great Depression? Exploring these topics informs our understanding of current global financial markets. During this course, students are asked to engage with these important topics and more, participating in lively discussion.
